EXTRA ROOM. EXTRA BACK SUPPORT.

Endeavour 101F Heavy Duty Office Chair

Need More Space and Support Than a Standard Office Chair?

If a standard office chair feels too small through the seat or doesn't provide enough support through your upper back, spending a full working day sitting can quickly become uncomfortable.

Backrest Height	Manually adjustable
Foam	Anti-bacterial foam padding
Maximum User Weight	110kg
Assembly	Approximately 10 minutes with tools and instructions included

Key features WHY IT WORKS

Generous Seating Area
A 52cm-wide and 53cm-deep seat provides more room than many standard office chairs, giving you a substantial surface to sit on.

Extra-High Back Support
The 66cm-high backrest provides greater coverage through the back, particularly useful for taller users or anyone who prefers a higher backrest.

Adjust It Around Your Body
Independent adjustments for seat height, backrest angle and seat angle let you fine-tune the chair to suit your preferred working position.

Smooth Everyday Use
The chair is designed as a dependable everyday workstation chair with smooth movement and a substantial, supportive feel.

IDEAL FOR

Taller Users · Users Wanting More Seat Space · Long-Hour Desk Workers · Workplace & Home Offices

For health professionals

Supporting OTs, physiotherapists, exercise physiologists and osteopaths with assessment reports.

WHEN TO RECOMMEND

- Employee has pain or discomfort in back
- Employee's occupational duties require frequent sitting at a desk
- Employee requires larger seat pan and higher back rest

CLINICAL JUSTIFICATION

The Endeavour 101F Heavy Duty Office Chair is recommended for larger workers who are inadequately supported by standard task chairs. Its larger seat (52cm wide x 53cm deep) provides adequate thigh and hip support, and the extra-high 66cm backrest provides support through the lumbar and thoracic spine. The 3-lever mechanism allows adjustment of seat height, seat tilt and backrest angle to fit the worker to the workstation.
