LUMBAR SUPPORT YOU CAN ACTUALLY FINE-TUNE

Ergo Air Ergonomic Chair

Tired of Office Chairs with Too Much — or Too Little — Lower-Back Support?

Lumbar support is personal. What feels supportive to one person can feel too firm, too soft or simply wrong for someone else.

- 7-year warranty
- Rated to 160kg
- AFRDI Level 6 certified
- Fabric

Lumbar Support	Adjustable air-pump lumbar support
Foam	Anti-bacterial foam padding
User Weight Rating	Up to 160kg
Certification	AFRDI Level 6
Assembly	Approximately 10 minutes with tools and instructions included

Key features WHY IT WORKS

Adjustable Lumbar Pressure
Inflate or release the lumbar support until you find the amount of lower-back contact that feels appropriate for you.

Comfortable for Long Use
Customers specifically describe the Ergo Air as comfortable during extended periods of sitting and everyday office work.

Fit the Chair to Your Desk
Seat-height adjustment helps you position yourself relative to your desk, keyboard and mouse rather than compensating with your shoulders and upper body.

Adjust More Than Just the Height
Seat depth, seat angle, backrest angle and backrest height can all be changed to create a more personalised workstation setup.

IDEAL FOR

- Long-Hour Desk Work
- Home Offices
- Back-Sensitive Users
- Ergonomic Workstations

For health professionals

Supporting OTs, physiotherapists, exercise physiologists and osteopaths with assessment reports.

WHEN TO RECOMMEND

- Employee has pain or discomfort in back
- Employee's occupational duties require frequent sitting at a desk
- Employee has significant injury or pain to lumbar region and requires adjustable protrusion of lumbar support
- Employee has minimal curve in lumbar region and finds typical lumbar support too protruded for comfort

CLINICAL JUSTIFICATION

The Ergo Air Ergonomic Chair is recommended where the worker requires adjustable lumbar support in addition to full chair adjustability. The integrated lumbar air pump allows the worker to increase or decrease lumbar support to suit their spinal profile and symptom presentation, promoting maintenance of lumbar lordosis. Its 4-lever mechanism and adjustable backrest height allow seat height, seat depth, seat tilt and backrest angle to be fitted to the worker. AFRDI Level 6 certification and a 160kg rating make it suitable for intensive commercial use.
