Assembly	Approximately 10 minutes, tools and instructions included

Key features WHY IT WORKS

AFRDI Load Rated to 160kg
A substantially higher user-weight rating than many standard office chairs, while retaining AFRDI Level 6 commercial certification.

4-Lever Ergonomic Mechanism
Adjust seat height, seat angle, seat depth and backrest angle rather than relying on one fixed chair position.

Breathable High Mesh Back
Allows airflow through the backrest while still providing a substantial support surface for prolonged desk work.

IDEAL FOR

- Long-Hour Office Work
- Higher-Capacity Seating
- Corporate Workstations
- Mesh-Chair Users

For health professionals

Supporting OTs, physiotherapists, exercise physiologists and osteopaths with assessment reports.

WHEN TO RECOMMEND

- Employee has pain or discomfort in back
- Employee's occupational duties require frequent sitting at a desk
- Employee is of height and size that can use a chair that is adjustable to 95% of the population

CLINICAL JUSTIFICATION

The Seville Mesh Ergonomic Chair is recommended to provide a fully adjustable, breathable seated posture for prolonged desk work. Its 4-lever mechanism allows independent adjustment of seat height, seat depth, seat tilt and backrest angle, with manual backrest height adjustment, enabling the chair to be fitted to the worker's anthropometrics. The high mesh back provides airflow for heat comfort, and the firm lumbar profile promotes maintenance of lumbar lordosis. AFRDI Level 6 certification and a 160kg load rating make it suitable for larger workers and intensive use.
